Topic of Discussion

The need for grasping benefits from market based flexibility, especially from demand side and distributed generation is more evident than ever. We have been elaborating a regional approach, while understanding that individual solutions are not sufficient to address energy security, high energy prices and climate changes.

Project partners present the results of the INTERFACE demonstrator with outlook to the next steps in OneNet project.

Audience: Market stakeholders, policy makers, regulators, academia of Finland, Estonia, Latvia, Lithuania.

Related Deliverable

All demo details, results and facts are gathered in Deliverable 5.5, which you can find [here](#)

Agenda

- 10:00 - 10:05** Welcome – Kalle Kukk
- 10:05 - 10:15** Introduction – Nikolaos Bilidis
- 10:15 - 11:00** Country implementations of Single Flexibility Platform
 - Finland (TSO perspective) – Jukka Rinta-Luoma
 - Finland (DSO perspective) – Antti Mutanen
 - Estonia – Kalle Kukk
 - Latvia – Ivars Zikmanis
- 11:00 - 11:15** Technical architecture – Marko Petron
- 11:15 - 11:30** Next steps – Jan Segerstam
- 11:30 - 11:55** Q&A
- 11:55 - 12:00** Wrap up

Fri, 25th Nov

10:00 - 12:00 EET

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 824330.
